Nassau, Begin Again

Nassau 

Since our foundation in 1971 as a specialized company for sporting goods, we have been endeavoring hard to keep our technology state-of-the-art and provide our customers with the best service they can get in the industry. Thanks to all those efforts, we could manage to get appointed as an official match ball supplier for several international tournaments: 1986 Asian Games for tennis, soccer, handball and volleyball, 1988 Olympics Games for tennis and 2 Australian Opens for tennis. In addition, we keep our balls approved every year by international sports federations such as International Tennis Federation(ITF), International Federation of Association Football(FIFA), Korea Football Association(KFA) and Korea Tennis Association(KTA).

New Technologies of 4-panel soccer ball

Nassau Soccer ball technologies

Nassau's exclusive advanced construction method and state-of-the-art technology

1. Outer Cover

Top-rated Korean microfiber PU is used for soft touch and high resilience and the aerodynamic four-panel construction minimizes air resistance, enabling accurate ball passing and long flight. Furthermore, the thermal bonding construction allows nearly zero moisture permeability, making the ball perfect for all weather conditions.

2. Special Bladder

A special butyl bladder is used for excellent airtightness and the special carbon supporting material is added to protect the ball from UV ray and oxidization.

3. Strong Backing Layer

The German fabric patch used for the backing layers keeps the spherical shape of the ball and improves its durability.

4. Hyper Elastic Foam Layer

The POE foam layer maximizes ball elasticity and strengthens ball resilience at the same time.
